

ENVIRONMENT, HEALTH & SAFETY POLICY

Pramet Tools, s.r.o., Šumperk

**Pramet Tools stands for sustainable growth.
Environment, health and safety is a strategic issue and have
an impact on all processes in the group globally.**

Pramet Tools shall actively participate in the process of sustainable development. We shall strive to minimize the environmental impact of our utilization of resources necessary for the development, manufacture and distribution of metal cutting and forming solutions. Operations shall be conducted in a manner that protects the environment and the health and safety of our employees.

Pramet Tools:

- Abide by applicable legislation and other relevant demands.
- Work with continuous improvements and preventive measures for environment, health and safety.
- Consider environmental issues in our day -to -day activities.
- Develop workplaces and processes in ways that minimize risk for our employees.
- Continuously evaluate, control and minimize the group's resource and energy consumption.
- Consider environmental issues during development of new products and processes.
- Offer our customers products which help to reduce their consumption of resources.
- Support and where necessary demand that our suppliers accede to our environmental, health and safety views.
- Openly inform interested parties about our policy, environmental impact and results.
